Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

In a user registration system, there is a requirement to implement a username validation module. Users attempting to register must adhere to specific criteria for their usernames to be considered valid.

Your task is to develop a program that takes user input for a desired username and validates it according to the following rules:

The username must not contain any spaces. The username must be at least 5 characters long.

Implement a custom exception, `InvalidUsernameException`, to handle cases where the entered username does not meet the specified criteria.

Input Format

The input consists of a string S, representing the desired username.

Output Format

If the username is valid, print "Username is valid: [S]".

If the username is invalid:

1. If the username is short, print "Invalid Username: Username must be at least 5 characters long"
2. If the username contains spaces, print "Invalid Username: Username cannot contain spaces"

Refer to the sample output for formatting specifications.

Sample Test Case

Input: John

Output: Invalid Username: Username must be at least 5 characters long

Answer

// You are using Java

```
import java.util.*;
```

```
class InvalidUsernameException extends Exception{
```

```
    InvalidUsernameException(String m){  
        super(m);  
    }  
}
```

```
public class Main{
```

```
    static void user(String s)throws InvalidUsernameException {
```

```
        if(s.contains(" ")){
```

```
            throw new InvalidUsernameException("Invalid username: Username  
cannot contain spaces");  
        }
```

```
    }
```

```
        if(s.length()<5){
```

```
            throw new InvalidUsernameException("Invalid Username: Username  
must be at least 5 characters long");  
        }
```

```
    }
```

```
    public static void main(String args[]){  
        Scanner in=new Scanner(System.in);
```

```
    }
```

```
String s=in.nextLine();
try{
    user(s);
    System.out.println("Username is valid: "+s);
}
catch(InvalidUsernameException e){
    System.out.println(e.getMessage());
}
}
```

Status : Correct

Marks : 10/10
